Ordering Information	
G403C	4G LTE N300 Wi-Fi Router

1. Maximum wireless signal rate derived from IEEE standard 802.11n/g/b/a specifications. Actual data throughput will vary. Network conditions and environmental factors, including volume of network traffic, building materials and construction, and network overhead, lower actual data throughput rate. Environmental factors may adversely affect wireless signal range.

2. Supported frequency bands are dependent on regional variants and may not be available in all markets.
